STEAM & EXTRACTOR CLEANER

GENERAL INFORMATION

This highly concentrated steam & extractor cleaner is designed for penetrating cleaning. It is formulated to dissolve and remove the most stubborn soils from rugs and carpeting to renew their appearance.

DIRECTIONS

Vacuum the carpet thoroughly and apply spot remover to all spots and deeply soiled areas. Add 1 or 2 ounces of steam cleaning concentrate per gallon of water in the machine. Steam clean the carpet in the usual manner overlapping each cleaning path so completion of the soil occurs and streaking is avoided. Brush the pile in one direction and allow to dry.

SPECIFICATIONS
